

Reading list: AS and A2 Physics

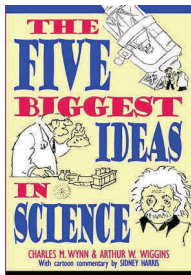

**Godel, Escher, Bach:
an eternal golden braid**
by Douglas R. Hofstadter

510.1 HOF

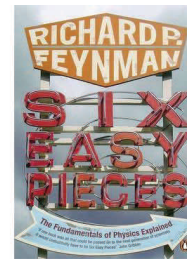

**Surely you're joking,
Mr Feynman!**
by Richard P. Feynman

530.92 FEY

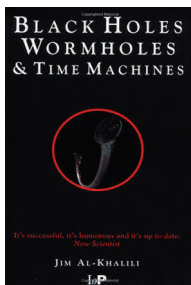

**The five biggest ideas
in science**
by Charles M. Wynn and
Arthur W. Wiggins

502 WYN

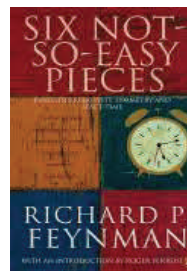

**Six easy pieces: the
fundamentals of
science explained**
by Richard P. Feynman

530.1 FEY

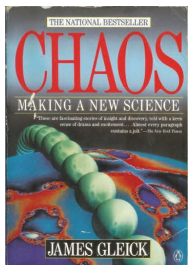

**Black holes, wormholes
and time machines**
by Jim Al-Khalili

530.1 ALK

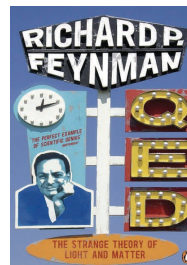

**Six not-so-easy pieces:
Einstein's relativity,
symmetry and space-time**
by Richard P. Feynman

530.1 FEY

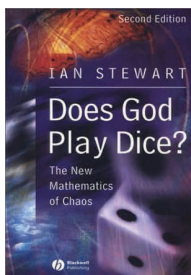

**Chaos: making a new
science**
by James Gleick

501 DAW

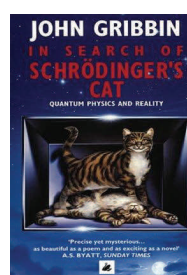

**QED: the strange theory
of light and matter**
by Richard P. Feynman

537 FEY

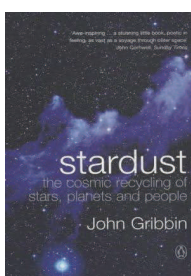

**Does God play dice?
The new mathematics
of chaos**
by Ian Stewart

501 STE

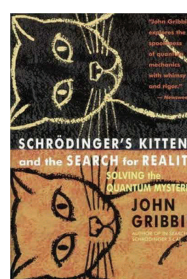

**In search of Schrodinger's
cat: quantum physics and
reality**
by John Gribbin

530.1 GRI

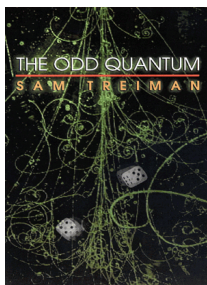

**Stardust: the cosmic
recycling of stars,
planets and people**
by John Gribbin

523.1 GRI

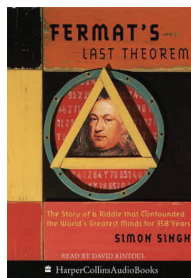

**Schrodinger's kittens and
the search for reality**
by John Gribbin

530.1 GRI

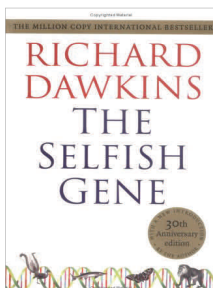

The odd quantum
by Sam Treiman

530.1 TRE

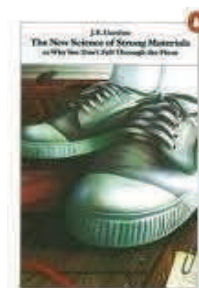

Fermat's last theorem
by Simon Singh

512 SIN

The selfish gene
by Richard Dawkins

575.1 DAW

The new science of strong materials
by J.E. Gordon

620.1 GOR

Physics Review

The flagship magazine for A-level Physics

1. Subject experts writing exclusively for A-level students

2. A* insight into advanced physics

3. Free online resources to support and develop understanding

4. Grade-boosting advice from leading ex-aminers

Back copies available - ask Librarian.

These are indexed on the catalogue to help you find the topic you need.

In each issue of *Physics Review*, leading examiners and subject specialists update students on the key topics they need to understand to achieve their potential at AS and A2.

Regular columns develop core A-level skills and help students apply their understanding to recent research affecting AS and A2 topics.
